

# ALUKIN SCR 850

The ALUKIN SCR 850 is an aluminium boat that has been designed for superior user experience during lengthy spells at sea. The berths at the front of the boat provide for a comfortable overnight stay, and beds can be made up in the cabin between the rear seats when the entire family will be spending the night on board. The cabin has a generous ceiling height and lets in ample air and natural light, while it also has dimmer lighting and plenty of stowage. The interior is characterised by classic Scandinavian design. Despite its spacious interior, the boat still has a slender and well-proportioned appearance and creates a sporty impression. It is equipped with Alukin's soundproofing concept, developed to deliver first-class comfort.

The wide side deck is 30 cm wide in anti-slip corrugated sheet metal with sturdy grab rails and a secure gunwale, which makes it easy to board and move around the boat for young and old alike, as well as the family's four-legged friends. This model has plenty of stowage and is equipped with Grammer chairs with adjustable damping, an electric panoramic glass roof and a kitchenette with a small sink. WC is available as an optional extra that can be built into the entranceway to the cabin.

The SCR 850 can be adapted for trolling with optimised afterdeck, rod holders and other equipment required for trolling.
